EDUCATION

2023-2026

Queen Mary's College

Bachelor Degree of Computer
Scienceoi

SKILLS

- Programming skills
- problem-solving techniques
- Typing skills(English)

PERSONAL STATEMENT

I'm a tech enthusiast and a Computer Science student with a keen interest in coding, software development, and emerging technologies. As a fresher, I've been developing my skills in Java and Python, and I enjoy using them to solve problems and build projects. I'm eager to explore new tools, gain hands-on experience, and contribute to innovative tech solutions.

WORK EXPERIENCE

Online Payment Fraud Detection
using ML

Present

- Online payment fraud is a growing concern in e-commerce and financial transactions.
- Fraudulent activities such as identity theft, phishing, and unauthorized access can result in huge financial losses.
- This project aims to build a fraud detection system using machine learning (ML) techniques to identify suspicious transactions in real time.
